OBJECTIVE

Computer Engineering graduate building specialized expertise in cybersecurity through George Brown Polytechnic's post-graduate program. Looking to bring my analytical mindset, technical background, and hands-on problem-solving to a Security Analyst role where I can contribute to risk mitigation and cybersecurity operations.

HIGHLIGHTS AND QUALIFICATIONS

- Computer Engineering graduate with hands-on experience in cybersecurity, network security, and automation.
- Holds ISC2 Certified in Cybersecurity (CC); working toward CompTIA Security+, Network+, and CCNA.
- Comfortable troubleshooting technical issues in lab and production settings.
- Works well both independently and as part of a team, especially when deadlines are tight.
- Strong communicator with a habit of clear documentation sharing with technical and non-technical audiences

TECHNICAL SKILLS

- **Languages:** PowerShell, Bash, Python, C#, HTML, CSS, .NET, SQL, C, Java
- **Operating Systems:** Windows 10/11, Linux (Ubuntu, Kali), Windows Server 2019
- **Networking & Security Fundamentals:** TCP/IP, subnetting, VLANs, DNS, DHCP, HTTP/S, FTP, SSH, VPN, OSPF, EIGRP, ACL configuration, firewall rules, intrusion detection and incident response fundamentals.
- **Security Tools & Technologies:** Wireshark, Cisco Packet Tracer (ASA), Sumo Logic (SIEM), OpenSSL, Any.run, VirusTotal, log & traffic analysis, threat detection, Windows Resource Monitor, Registry Editor
- **Cryptography & Data Protection:** Symmetric/asymmetric encryption, OpenSSL, hashing, PKI basics, TLS/SSH
- **Systems & Cloud Technologies:** Windows Server 2019, Active Directory, Group Policy, virtualization (VMware, VirtualBox), Azure fundamentals, cloud security basics
- **Development & Tools:** Git / GitHub, Visual Studio, VS Code, REST API basics and troubleshooting
- **Productivity & Documentation:** Microsoft Office, report writing, documentation

EDUCATION

Cybersecurity, Graduate Certificate Program
George Brown College, Toronto, ON

Jan 2026 – Dec 2026

- Used Wireshark to scan vulnerabilities and analyze network traffic.
- Configured ACLs and simulated ASA firewall packet filtering in Cisco Packet Tracer to mitigate data plane threats.
- Managed Linux and Windows Server 2019 environments including user accounts, permissions, and server roles.
- Developed custom SIEM queries and dashboards in Sumo Logic to detect, investigate, and report on security events.
- Developed Security Education, Training, and Awareness (SETA) programs aligned with organizational risk profiles.
- Performing advanced threat hunting and building incident response playbooks in an intermediate SOC environment.
- Conducted structured penetration testing engagements using ethical hacking methodologies including reconnaissance, exploitation, and reporting.

Bachelor of Science in Computer Engineering
University of Baguio, Baguio, Philippines

Aug 2015 – May 2023

PERSONAL PROJECTS

Homelab Infrastructure

Self-Hosted Security Lab | Proxmox, OPNsense, WireGuard, Docker

- Deployed and administered a Proxmox-based home lab hosting a firewall/router VM (OPNsense), containerized services, and network segmentation across VLANs

PERSONAL PROJECTS CONTINUED...

Homelab Infrastructure

Self-Hosted Security Lab | Proxmox, OPNsense, WireGuard, Docker

- Configured a WireGuard VPN with split tunneling to isolate and encrypt select service traffic independent of the WAN
- Exposed internal services securely via Cloudflare Tunnel with TLS termination, eliminating inbound port exposure

PROFESSIONAL EXPERIENCE

Accenture, Philippines

Apr 2025 – Dec 2025

Associate Software Engineer

- Helped automate task with PowerShell scripting cutting time by 80%.
- Found and fixed bugs in scripts to keep them running smoothly.
- Worked with the team members to test, document, and improve scripts and system workflows to ensure reliability and consistency.
- Assisted in troubleshooting system and deployment issues, reducing downtime and improving system performance.
- Applied scripting and automation best practices to improve efficiency and maintainability of internal tools.

ePerformax Contact Centers and BPO, Philippines

Jul 2024 – Mar 2025

Customer Service Representative

- Managed over 60 cases each day, showing strong skills in sorting incidents, setting priorities and keeping records.
- Investigated order and delivery problems by checking system details and working with other teams, using processes like issue analysis and escalation.
- Communicated clearly with customers and logistics teams, translating technical and operational issues into accessible updates.
- Adhered to company policies when handling sensitive customer information, ensuring data confidentiality and compliance with all procedures
- Used internal systems and CRM tools efficiently to track, update, and resolve customer issues in real time.
- Improved customer satisfaction by resolving complex issues through effective problem-solving and communication.

ClutchPoint Inc.

Jan 2019 – Jan 2020

Graphic Designer

- Managed digital assets for public platforms, ensuring data integrity and secure content handling.
- Utilized Adobe Photoshop to create and optimize digital content for online platforms.
- Maintained organized file structures to support team collaboration and efficiency.
- Operated in fast-paced environments, developing strong attention to detail.
- Collaborated with team members to meet deadlines and strengthen communication skills.

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC)

July 2026
